Over a year

We finally created the most dreamy dance shoes

The world's first pair of washable

3D compression dance shoes

Hi dancers, we are IM I M B J

A brand which create 3D compression dance shoes

Let's solve some problem together

**The pain only dancers know**

At beginnig.....

A professional dancer Ting-Wei Hsu

Want to solve the troubles he meet with traditional dance shoes

The dance shoes smell bad after wearing them for a long time. I really want to wash the dance shoes.

The traditional dance shoes is not very fit to feet, and it is easy to let feet turn around and let dancer get injury

There is glue on the soles, and the soles of the feet are sticky after washing the shoes

When I am dancing, the stretch belt of the traditional dance shoes will press the back of my foot, which is extremely painful

Dance shoes can't be stretched and changed according to foot movement

Traditional dance shoes have been worn for so long  
Have you thought about changing it?

**3D Washable compression  
arch support dancer's shoes**

**Professional dance shoes + compression socks**

**Subvert the imagination of dancing shoes**

**Unprecedented comfort**

**The world's first pair  
washable dance shoes**

Easy to wash · Just Throw it in the washing machine

You no longer have to worry about the bad smell of dance shoes and always have to buy a lot of shoes to replace the old one.

The 3D Compression dance shoes fit your ankle and arch perfectly  
when you are dancing it will tighten and protect your muscle  
it will avoid injury to happened on your feet

**In the heart of every dancer**

**Everyone has a pair of dream shoes**

Tighten the ankle

Lift the arch of the foot

perfect support

easy to wash

Non-slip soles

heel counter

Arch Support

Window and ventilation

## ANKLE

**Compared to traditional dance shoes, the ankle is not covered properly. The dance shoes provide complete strong coverage for the ankle, the compression knitting innovation protects your ankle, holds the ankle in place for heel protection**

**For dancer, they usually overuse of the sole and arch of the foot. The dance shoes **Arch lift technology design**. Let the dancers, especially when they're doing stand on tiptoe, The arch of the foot has better coverage to lift and support, Dancers can stand on tiptoe more safely and comfortably.**

## ARCH

## BREATHABLE

Anyone who wears dancing shoes knows that dancing shoes don't fit your feet. The toes will be very painful after the long usage during long hours dancing, and the new 3D dance shoes is elastic and not tight on the forefoot. It also has **Ventilation hole design** allows feet to breathe.

## SOLE

The most important soul craftsmanship is the sole of dancing shoes, the **highly wear-resistant suede anti-slip pad**, allows dancers to express themselves without worries.

是鞋還是襪

**You don't have to worry about forgetting to bring your dance shoes to class. After wearing them, you can put on your shoes and go out.**

**/ It function like both shoes and socks**

Extreme / Wrapping / Extending

**Perfectly fit**

**become part of you body**

The perfect combination of compression socks and dance shoes  
Say BYE BYE to the Pain caused by Traditional Dance Shoes

The traditional dance shoes cannot be cleaned/washed  
so it make the replacement rate of items too high

New dance socks shoes can be washed directly  
To achieve the purpose of "environmental protection"

## Meet Our Team

IMIMBJ creative director  
Shu-ting chang

Professional dancer  
Ting-wei Hsu

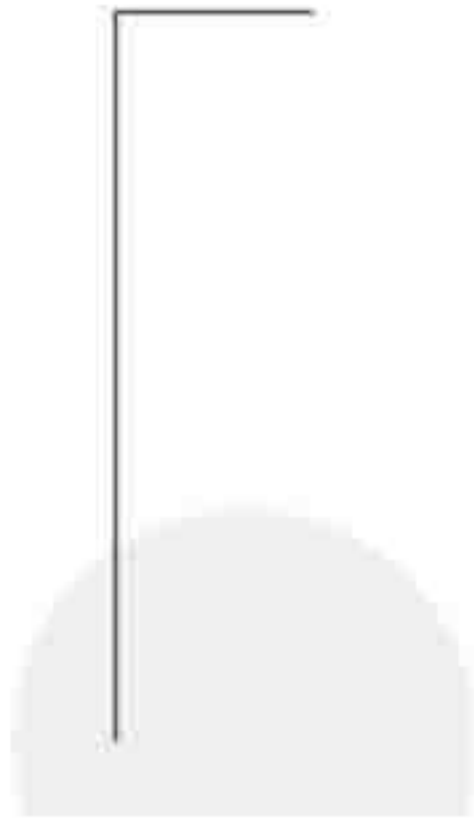

Founder of Walkplus  
Zheng-you Lai

It all start with

The birth of the first pair of dance socks started like this...

Professional dancers have to dance 8 hours a day like every day. So to have a best gear to protect their foot is very important. The traditional of fabric dancer's shoes can not protect dancer's feet as it can, so usually dancers still have to doing taping to protect their feet or after a day of hard core working they have to use a lot of ice to cooling and relieving their feet. So I have imply the medical compression socks knitting engineering technology to do this 3D Dancer's shoes to improve the dancer's ankle support, and they can then dance more freely with bare feet feeling to enhance dancers nature performance.

I

Same as basketball shoes,  
To protect the heel

Compression elastic weave with ribs on the back heel

Make a "heel counter",

Helps fix the heel

II

Designed like compression socks from the front feet

Create a taping design that fits your feet

III

Designed with an X-bandage

on the bottom of the arch

to increase the stability of the foot movement

IV

Opening holes

on a T-shaped thin fabric on the forefoot,

Relief of stuffy discomfort

due to sweating during movement.

V

Add V-shaped knitting on both sides of the forefoot.

It increases the space for movement of the front toes

To let dancer expressing performance more freely

VI

Cushioning technology applied on the forefoot

To improved forefoot comfortability and durability

VII

The height of the whole shoe is

Make it the same height as the basketball shoes

when you were tired from moving or lacked concentration

You can avoid injuries.

▲ Design manuscript

A photograph showing a person's legs from the knees down. They are wearing black socks and a single black high-heeled shoe on their right foot. The left foot is not visible. They are standing on a large pile of discarded, worn-out brown leather shoes. The background is a plain, light-colored surface.
